

Going Together with the Socially Neglected!

World's First GTSN Index

What is the **GTSN** Index?

The **Going Together with the Socially Neglected** (GTSN) Index is a pivotal **globally pioneering** tool in assessing the extent to which the city's core initiative of the 8th municipal administration, "**going together with the socially neglected**," actually benefits the people and analyzing it to enhance policy effectiveness.

50 indicators across 6 areas closely related to the lives of citizens

Why do we need the GTSN Index?

To eliminate blind spots in welfare
and improve policy effectiveness

We also take care of
new vulnerable groups
Such as young people
taking care of their families,
malnourished seniors,
and the digitally challenged!

We measure and
disclose indicators annually
to increase citizen satisfaction.

No matter how **mayor** changes,
no matter how **time** passes,
Seoul will continue to
support vulnerable groups
utilizing the **GTSN Index!**
